ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2018

Management Discussion of Fund Performance

June 7, 2018

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended March 31, 2018, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Investment Objective and Strategies

The Fund seeks long-term capital growth by investing mainly in Canadian equities. The Fund uses a growth at a reasonable price style of investing and may hold up to 49% of its assets in foreign investments.

Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for medium- to long-term investors looking for a Canadian equity fund to hold as part of their portfolio, who can handle the volatility of stock markets and who have a medium tolerance for risk.

Results of Operations

Investment Performance

The performance of the Fund's Series A and Quadrus Series securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the year, the Fund's Series A securities returned 12.8%, and Quadrus Series securities returned 12.7% (after deducting fees and expenses paid by the series). This compares with a return of 5.2% for a blended index composed of a 60% weighting in the Fund's broad-based index, the S&P/TSX Composite Index (returned 1.7%), a 30% weighting in the S&P 500 Index (returned 10.4%) and a 10% weighting in the MSCI EAFE (Net) Index (returned 11.0%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Canadian equity markets were up slightly despite continued weak economic growth as measured by gross domestic product. Challenges included concerns about the renegotiation of the North American Free Trade Agreement and uncertainty regarding future policy rate increases by the Bank of Canada, which raised rates three times during the year. Although the West Texas Intermediate crude oil price ended the year higher, overall sentiment toward energy equities remained poor and their prices declined.

Within the S&P/TSX Composite Index, health care, information technology and consumer discretionary were the strongest sectors, while energy, materials and utilities were the weakest.

U.S. equity markets were generally strong earlier in the year. In December, the Trump administration signed off on tax-reform measures expected to provide fiscal stimulus. Strong market performance was disrupted in January as solid wage growth signalled rising inflation. Markets interpreted this as a sign that the U.S. Federal Reserve would continue to raise the federal funds rate. Coupled with concerns about global trade tensions, this led to increased volatility, and markets declined from earlier highs.

Within the S&P 500 Index, information technology, financials and consumer discretionary were the strongest sectors in Canadian dollar terms, while telecommunication services, consumer staples and energy were the weakest.

Within the MSCI EAFE (Net) Index, Austria, Norway and Italy were the strongest performers in Canadian dollar terms, while Israel, Australia and New Zealand were the weakest. From a sector perspective, information technology, energy and materials were the strongest performers, while telecommunication services, health care and consumer staples were the weakest.

The Fund outperformed the broad-based index primarily because of its exposure to U.S. and international equities, which outperformed Canadian equities. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund outperformed the blended index primarily because of stock selection in the health care and consumer staples sectors. Stock selection in the consumer discretionary sector, as well as an overweight position and stock selection in the information technology sector, also contributed. From a geographic perspective, the Fund's stock selection in Canada and the United States contributed to performance.

Conversely, stock selection in the industrials sector detracted from performance.

The Fund partially hedged its U.S. dollar exposure, which contributed to performance as the U.S. dollar depreciated relative to the Canadian dollar.

Over the year, portfolio activity and market effect resulted in increased exposure to France, new exposure to the Netherlands and reduced exposure to the United States. At the sector level, exposure to consumer staples, health care and materials increased, while exposure to information technology, consumer discretionary and industrials decreased. Changes to the portfolio included new positions in Aon PLC, Heineken NV and Stryker Corp., and the elimination of the positions in C.R. Bard Inc., Automatic Data Processing Inc. and Marsh & McLennan Companies Inc.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2018

Net Assets

The Fund's NAV increased by 55.0% to \$1.4 billion at March 31, 2018, from \$914.3 million at March 31, 2017. This change was composed primarily of \$140.9 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, \$363.0 million in net sales, and \$0.8 million in cash distributions.

See *Other Related Party Transactions* for the percentage of the Fund's NAV owned by Mackenzie, affiliates of Mackenzie and funds managed by Mackenzie. As a result of these investments, the Fund is subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors.

Fees and Expenses

The management expense ratio ("MER") for Series A of 2.46% during the year ended March 31, 2018, was unchanged from the MER for the year ended March 31, 2017. The MER for Quadrus Series of 2.50% during the year ended March 31, 2018, was slightly lower than the annualized MER of 2.51% for the period ended March 31, 2017. The MERs (before and after waivers or absorptions, if any) for each series are presented in the *Financial Highlights* section of this report. The MERs for D5 Series and L8 Series decreased due to a decrease in fund costs.

Recent Developments

The portfolio management team expects global trade policies to remain both a near-term focus and a source of market volatility, given the rhetoric of the U.S. and Chinese governments. In Canada, where residential housing is important, policy rate increases by the Bank of Canada combined with tightening mortgage rules may dampen growth. Now that U.S. corporate taxes are more in line with Canadian rates, there are early signs of capital outflow from Canada. The team is finding opportunities in Canadian companies that have international exposure and those domestic businesses that have proven to be less sensitive to the economic cycle.

At year-end, corporate earnings were growing rapidly and leading economic indicators were signalling strength, which should be supportive of equity markets. Equity valuations appear reasonable to the team given low bond yields. If inflation and interest rates increase materially, the team will adjust the portfolio accordingly.

On March 28, 2018, Mackenzie announced that Mackenzie Canadian Large Cap Growth Fund will merge into the Fund effective on or about July 6, 2018. This merger was approved by the Mackenzie Funds' Independent Review Committee.

On June 22, 2018, investors in Mackenzie Canadian All Cap Dividend Growth Fund will vote on merging into the Fund. This second proposed merger, which would be effective on or about July 6, 2018, is also subject to the receipt of regulatory approvals. Mackenzie does not consider either merger to be a material change from the Fund's perspective.

Effective June 1, 2018, Series PWF securities were consolidated into Series F securities.

Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not otherwise included in management fees. See also *Management Fees*.

Other Related Party Transactions

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. Series IG securities are issued on a prospectus-exempt basis to mutual funds managed by I.G. Investment Management Ltd., which is a company affiliated with Mackenzie. Series S securities are also issued on a prospectus-exempt basis to London Life Insurance Company, The Great-West Life Assurance Company and The Canada Life Assurance Company (collectively, the "Related Insurance Companies"), all of which are companies affiliated with Mackenzie. At March 31, 2018, the Related Insurance Companies owned 0.9% of the Fund's NAV, funds managed by I.G. Investment Management Ltd. owned 8.1% of the Fund's NAV, and funds managed by Mackenzie owned 3.8% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

At March 31, 2018, Mackenzie had an investment of \$0.2 million in the Fund (less than 0.1% of the Fund's NAV).

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2018

CANADIAN EQUITY FUND

Past Performance

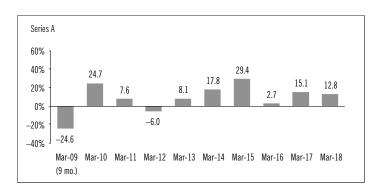

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

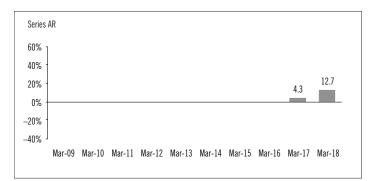

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax adviser regarding your personal tax situation.

On November 26, 2016, the Fund changed its mandate to remove the ability to invest in fixed income and government securities. The past performance before this date was achieved under the previous objectives.

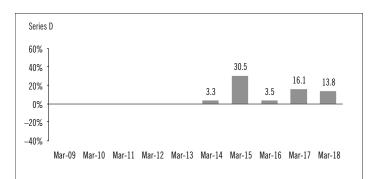

Year-by-Year Returns

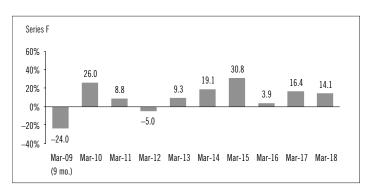

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

The MSCI EAFE (Europe, Australasia, Far East) (Net) Index is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the United States and Canada. It consists of 21 developed market country indices. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie and Quadrus may waive or absorb operating expenses at their discretion and stop waiving or absorbing such expenses at any time without notice.

- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

Quadrus Investment Services Ltd. ("Quadrus"), an affiliate of Mackenzie, is the principal distributor for the Quadrus series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to Mackenzie. Under this arrangement, Quadrus was entitled to approximately 79% of the total management fees that Mackenzie received from the Quadrus Group of Funds during the year. As the principal distributor of the Quadrus series securities of the Fund, Quadrus is responsible for paying certain administrative costs and all distribution-related payments to registered dealers whose clients invest in those securities of the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 44% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series. The higher proportion of distribution-related payments is primarily attributable to sales commissions related to gross sales of redemption charge securities of the Fund.
