# **Management Discussion of Fund Performance**

June 7, 2018

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended March 31, 2018, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

## Investment Objective and Strategies

The Fund seeks income and capital growth by investing mainly in Canadian government fixed income securities and high-quality, or investment grade, corporate fixed income securities and asset-backed securities. The Fund may hold up to 30% of its assets in foreign investments.

#### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus. The Fund is suitable for short- to medium-term investors looking for a Canadian fixed income fund to hold as part of their portfolio, who can handle the volatility of bond markets and who have a low tolerance for risk.

### Results of Operations

### **Investment Performance**

The performance of the Fund's Series SC and Series LB securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the year, the Fund's Series SC and Series LB securities returned 0.7% (after deducting fees and expenses paid by the series). This compares with the FTSE TMX Canada Universe Bond Index return of 1.4%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

The Canadian bond market lagged the broader global bond market during the year. After raising its policy rate three times in response to robust economic data, the Bank of Canada put further increases on hold amid uncertainty prompted by threatened U.S. tariffs and a slowdown in household borrowing. The Canadian yield curve flattened as yields on shorter- and medium-term bonds rose significantly relative to longer-term bonds.

The Fund underperformed the index primarily due to duration positioning and security selection within corporate bonds. Security selection and yield curve positioning within federal bonds contributed to performance.

The Fund hedged its foreign currency exposure, which contributed slightly to absolute performance as the U.S. dollar depreciated relative to the Canadian dollar.

The Fund used short futures to manage duration, which contributed to performance.

Over the year, portfolio activity and market effect resulted in increased exposure to the United States and Canada, and reduced exposure to Denmark. At the sector level, exposure to federal and foreign government bonds increased, while exposure to provincial bonds, corporate bonds and mortgage-backed securities decreased.

#### **Net Assets**

The Fund's NAV increased by 20.9% to \$1.3 billion at March 31, 2018, from \$1.1 billion at March 31, 2017. This change was composed primarily of \$18.2 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, \$210.6 million in net sales, and \$7.9 million in cash distributions.

See Other Related Party Transactions for the percentage of the Fund's NAV owned by Mackenzie, affiliates of Mackenzie, funds managed by Mackenzie and funds managed by affiliates of Mackenzie. As a result of these investments, the Fund is subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions. At March 31, 2018, Mackenzie had received no such notices.

Subsequent to March 31, 2018, funds managed by an affiliate of Mackenzie (refer to *Other Related Party Transactions* section) purchased approximately \$141 million of Series IG securities in the Fund. These subscriptions did not result in a significant change in the Fund's portfolio allocation and were managed without any adverse effect on the Fund.

#### Fees and Expenses

The management expense ratios ("MERs") for Series SC of 1.35% and for Series LB of 1.41% during the year ended March 31, 2018, were unchanged from the MERs for the year ended March 31, 2017. The MERs (before and after waivers or absorptions, if any) for each series are presented in the *Financial Highlights* section of this report.

#### Recent Developments

The portfolio management team believes there is some uncertainty as to whether the U.S. Federal Reserve, under new chair Jerome Powell, will be sensitive to market volatility in its messaging and actions. The market continues to anticipate two to three more increases in the federal funds rate in 2018. With U.S. economic growth likely to remain solid, the team believes the Federal Reserve will pursue this path unless volatility increases or economic data is disappointing. In Canada, the team believes growing business confidence strengthens the case for another policy rate increase in July.

If more rate increases occur in either the United States or Canada, the team expects the yield curve to continue flattening as shorter-term yields rise.

The team is maintaining the Fund's overweight allocation to corporate bonds and continues to improve the credit quality of its corporate bond exposure, which may help mitigate risk from potential market declines.

Effective June 1, 2018, Series PWF securities were consolidated into Series F securities.

### Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

#### **Management and Administration Services**

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not otherwise included in management fees. Operating expenses attributable to B-Series are charged directly to that particular series. See also *Management Fees*.

### **Other Related Party Transactions**

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. Series IG securities are issued on a prospectus-exempt basis to mutual funds managed by I.G. Investment Management Ltd., which is a company affiliated with Mackenzie. Series S securities are also issued on a prospectus-exempt basis to London Life Insurance Company, The Great-West Life Assurance Company and The Canada Life Assurance Company (collectively, the "Related Insurance Companies"), all of which are companies affiliated with Mackenzie. At March 31, 2018, the Related Insurance Companies owned 25.2% of the Fund's NAV, funds managed by I.G. Investment Management Ltd. owned 17.7% of the Fund's NAV, and funds managed by Mackenzie owned 24.7% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

At March 31, 2018, Mackenzie had an investment of \$5,263 in the Fund (less than 0.1% of the Fund's NAV).

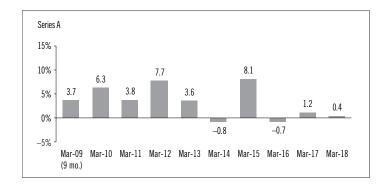

#### **Past Performance**

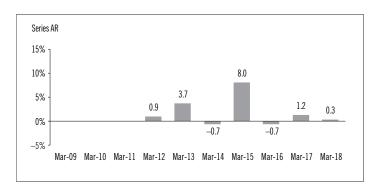

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax adviser regarding your personal tax situation.

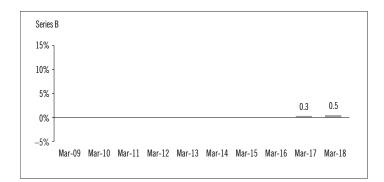

## Year-by-Year Returns

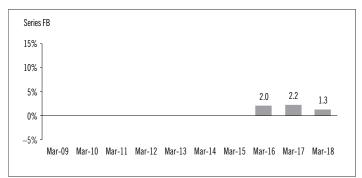

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

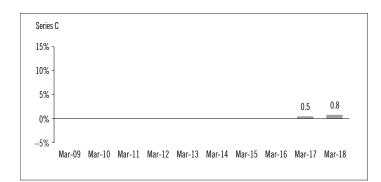

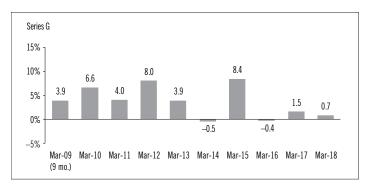

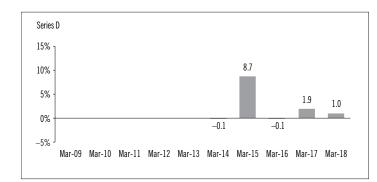

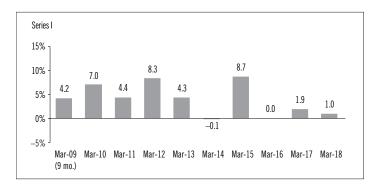

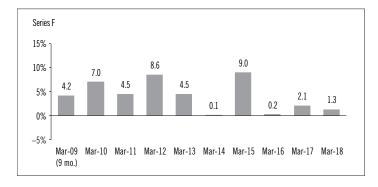

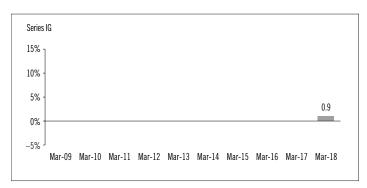

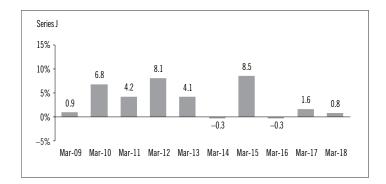

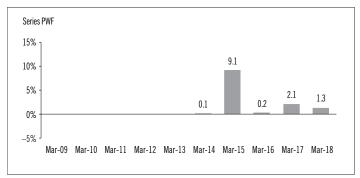

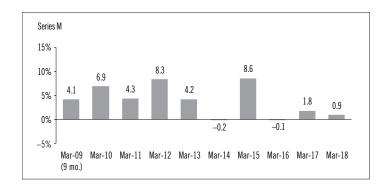

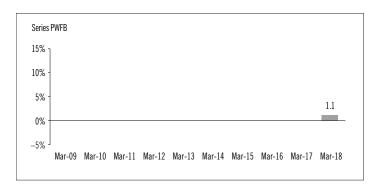

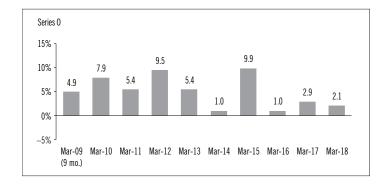

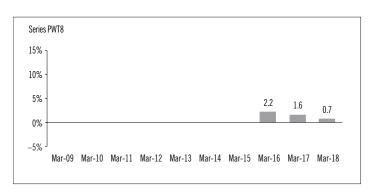

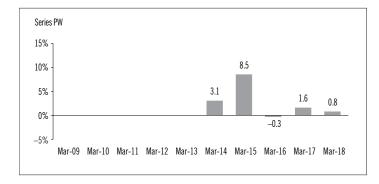

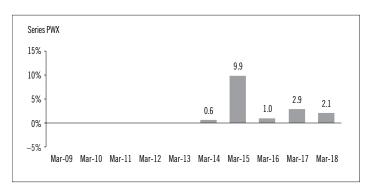

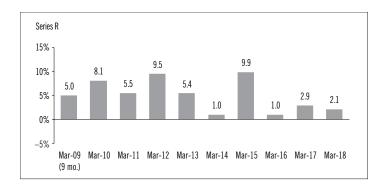

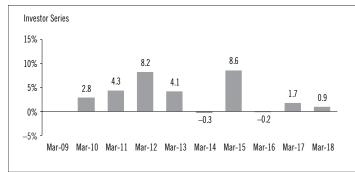

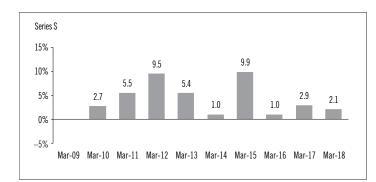

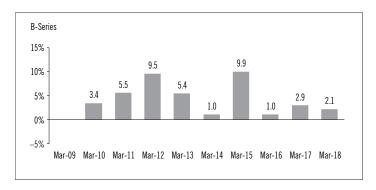

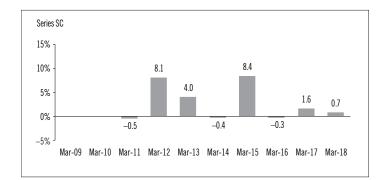

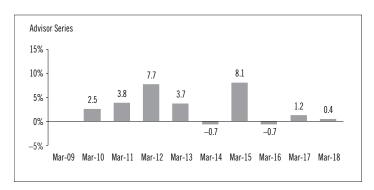

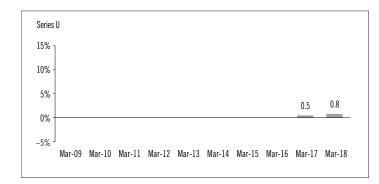

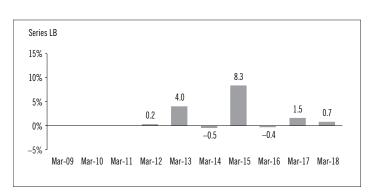

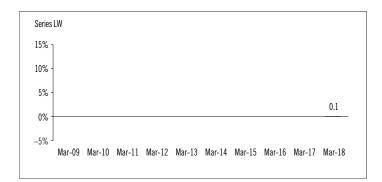

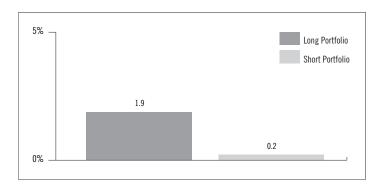

The following bar chart presents the performance of the Fund's long and short portfolio positions for the year ended March 31, 2018, before deducting fees and expenses and before the effect of other assets (liabilities).

## **Annual Compound Returns**

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2018. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the Notes to Financial Statements.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to Mackenzie. Under this arrangement, LBC was entitled to approximately 25% of the total management fees that Mackenzie received from the LBC series of all Mackenzie funds during the year. Mackenzie is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 36% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.
