## Management Discussion of Fund Performance

November 13, 2018

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended September 30, 2018, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

### Results of Operations

#### Investment Performance

The performance of the Fund's Series A securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series A securities returned 1.0% (after deducting fees and expenses paid by the series). This compares with a return of 3.6% for a blended index composed of a 52.5% weighting in the Fund's broad-based index, the MSCI World (Net) Index (returned 7.2%), and a 47.5% weighting in the ICE BofAML Global Broad Market (Hedged) Index (returned -0.3%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

The global economy expanded over the period despite continued trade and geopolitical uncertainty. The U.S. Federal Reserve raised the federal funds rate twice in response to the strengthening U.S. economy and rising inflation. The European Central Bank kept its policy rate steady, but confirmed that it will conclude its asset purchase program at the end of 2018. Emerging markets equities fell in response to rising interest rates, a stronger U.S. dollar and global trade tensions.

Within the MSCI World (Net) Index, Israel, the United States and Norway were the strongest performers in Canadian dollar terms, while Italy, Belgium and Austria were the weakest. From a sector perspective, health care, information technology and energy were the strongest performers, while financials, materials and consumer staples were the weakest.

Performance varied across global government bond markets over the period, but in general yields rose across the curve. Shorter-term yields increased significantly, causing yield curves to flatten, particularly in Canada and the United States. As economic data improved, central banks in Canada, the United States, the United Kingdom and Norway raised their policy rates. Emerging market bonds underperformed as a result of the strong U.S. dollar. The Canadian dollar was volatile as the benefit of a robust economy was offset by trade concerns. A generally strong global economy, low default rates and low issuance late in the period led to positive returns from high-yield bonds.

The Fund underperformed the broad-based index primarily because of its allocation to fixed income, which underperformed equities. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund underperformed the blended index primarily because of stock selection in the health care, information technology, consumer staples and consumer discretionary sectors.

Within the equity portion of the Fund, stock selection in the United States, as well as exposure to Brazil and China, also detracted from performance. Conversely, stock selection in the financials and materials sectors contributed to performance, as did stock selection in France, the Netherlands and Germany.

Within the fixed income portion of the Fund, small exposures to emerging market bonds – including in Argentina, Brazil, Turkey and Russia – detracted from performance, as did an underweight position in core European bond markets. Conversely, holdings in term loans and high-yield bonds contributed to performance, as did overweight exposure to bonds denominated in Australian and New Zealand dollars.

The foreign currency exposure of the fixed income portion of the Fund was only partially hedged, which detracted from performance primarily as emerging market currencies depreciated relative to the Canadian dollar.

The Fund held put options on high-yield bonds to help manage the Fund's credit risk exposure, which detracted slightly from performance. The Fund used short futures to manage duration in specific markets, which contributed to performance. The Fund used currency options to gain exposure to and protect the portfolio from anticipated volatility in the currency market, which also contributed.

Over the period, portfolio activity and market effect resulted in increased exposure to equities and decreased exposure to fixed income. From a geographic perspective, exposure to the United States increased. The sector positioning of the equity portion of the Fund did not change significantly. Within the fixed income portion of the Fund, exposure to term loans increased, while exposure to foreign government bonds decreased.

BALANCED FUND

## Net Assets

The Fund's NAV increased by 5.5% to \$1.4 billion at September 30, 2018, from \$1.3 billion at March 31, 2018. This change was composed primarily of \$16.7 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, \$59.2 million in net sales, and \$4.3 million in cash distributions.

## Fees and Expenses

The annualized management expense ratio ("MER") for Series A of 2.32% during the period ended September 30, 2018, was unchanged from the MER for the year ended March 31, 2018. The MERs (before and after waivers or absorptions, if any) for each series are presented in the *Financial Highlights* section of this report. The MERs for Series F, Series PW, Series PWF8, Series PWT5 and Series PWT8 decreased due to a decrease in the management and/or administration fee rates effective June 1, 2018, as noted in the *Fund Formation and Series Information* section of the report.

## Recent Developments

The equity portfolio management team believes that, given its long-term time horizon and focus on high-quality companies, the Fund may benefit from market volatility. The team will attempt to take advantage of any volatility as it occurs by purchasing undervalued holdings in companies that in the team's view have a positive long-term outlook.

The fixed income portfolio management team believes most developed countries are shifting toward less accommodative monetary policies. In the team's opinion, unless U.S. domestic market volatility and economic risks rise notably, the Federal Reserve is likely to increase the federal funds rate by December. The team expects this to flatten the yield curve further. Now that a North American trade deal has been negotiated, the team believes the Bank of Canada will also raise its policy rate, although more slowly than its U.S. counterpart due to its concerns about high levels of household debt. The team believes emerging markets may continue to face challenges unless the U.S. dollar, which currently appears to be supported by strong domestic economic growth, starts to weaken.

Effective June 1, 2018, Series PWF securities were consolidated into Series F securities, and Series PWF8 securities were consolidated into Series F8 securities.

Effective January 1, 2019, Series O6 will be renamed Series O5, and the fixed-rate distribution of this series will change from 6% to 5%.

## Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

## Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

## Other Related Party Transactions

Mackenzie is wholly owned by IGM Financial Inc. ("IGM"). IGM is a subsidiary of Power Financial Corp., which in turn is a subsidiary of Power Corp. of Canada. Companies related to Power Financial Corp. are therefore considered affiliates of Mackenzie. At September 30, 2018, the Fund held the following investment(s) in companies affiliated with Mackenzie: \$5.6 million invested in securities issued by Pernod Ricard SA. The investment(s) represented 0.4% of the Fund's NAV. In making the investment(s), Mackenzie relied on the approval of the Mackenzie Funds' Independent Review Committee. The Independent Review Committee issued the approval on the basis that the investment(s) would be made in compliance with Mackenzie's policies. Mackenzie's policies are designed to ensure that any related party transaction (i) is made free from any influence by an entity related to Mackenzie and without taking into account any considerations relevant to an entity related to Mackenzie; (ii) represents the business judgment of Mackenzie, uninfluenced by considerations other than the best interests of the Fund; and (iii) achieves a fair and reasonable result for the Fund.

Series S securities are offered on a prospectus-exempt basis to London Life Insurance Company, The Great-West Life Assurance Company and The Canada Life Assurance Company (collectively, the "Related Insurance Companies"), all of which are companies affiliated with Mackenzie. At September 30, 2018, the Related Insurance Companies owned less than 0.1% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

At September 30, 2018, Mackenzie had an investment of \$0.8 million in the Fund (0.1% of the Fund's NAV).

## Past Performance

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

On April 30, 2014, the Fund changed its mandate from investing in other mutual funds to investing directly in fixed income securities and income-oriented equities. The past performance before this date was achieved under the previous objectives.

- These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.
- Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 45% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series. The higher proportion of distribution-related payments is primarily attributable to sales commissions related to gross sales of redemption charge securities of the Fund.

Series G securities are no longer available for sale, except for additional purchases by investors who have held these securities since December 11, 2017.

Series PWF and Series PWF8 securities are no longer available for sale. Effective June 1, 2018, Series PWF and Series PWF8 securities were consolidated into Series F and Series F8 securities, respectively.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
