#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2018

### Management Discussion of Fund Performance

#### June 7, 2018

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended March 31, 2018, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

### **Investment Objective and Strategies**

The Fund seeks long-term capital growth by investing primarily in equities of companies in emerging markets. The Fund will focus its investments in those countries where it identifies strongly developing economies and in which the markets are becoming more sophisticated.

### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for long-term investors looking for an emerging markets global equity fund to hold as part of their portfolio, who can handle the volatility of stocks in emerging markets and who have a medium to high tolerance for risk. Previously, the Fund was deemed suitable for investors who had a high tolerance for risk. The time horizon for the Fund remains suitable for investors who want a long-term investment.

### **Results of Operations**

#### **Investment Performance**

The performance of the Fund's Series A and Quadrus Series securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the year, the Fund's Series A securities returned 19.3%, and Quadrus Series securities returned 19.1% (after deducting fees and expenses paid by the series). This compares with the MSCI Emerging Markets (Net) Index return of 20.8%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Emerging markets equities posted very strong returns earlier in the year in Canadian dollar terms, but were more subdued in the final quarter. Market volatility returned as investors reacted to higher global interest rates, trade tensions and skepticism over ever-increasing valuations.

Within the MSCI Emerging Markets (Net) Index, Peru, China and Hungary were the strongest performers in Canadian dollar terms, while Pakistan, Qatar and United Arab Emirates were the weakest. From a sector perspective, information technology, health care and real estate were the strongest performers, while telecommunication services, utilities and industrials were the weakest.

The Fund underperformed the index primarily because of an overweight position and stock selection in the consumer staples sector. Underweight positions and stock selection in the energy and health care sectors also detracted from performance, as did stock selection in Brazil and Thailand.

Conversely, stock selection in the financials sector and underweight exposure to the telecommunication services sector contributed to performance, as did stock selection in China and South Africa.

The Fund did not hedge its foreign currency exposure, which detracted from absolute performance as most currencies held in the Fund depreciated relative to the Canadian dollar.

Over the year, portfolio activity and market effect resulted in increased exposure to China and Hong Kong, and reduced exposure to South Africa, Russia and India. At the sector level, exposure to information technology and financials increased, while exposure to energy, health care and industrials decreased.

#### **Net Assets**

The Fund's NAV increased by 15.0% to \$1.1 billion at March 31, 2018, from \$945.7 million at March 31, 2017. This change was composed primarily of \$200.4 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, \$56.2 million in net redemptions, and \$2.2 million in cash distributions.

At March 31, 2018, 12.5% of the Fund's NAV was held by investors that individually owned 10% or more of the Fund. See also *Other Related Party Transactions* for the percentage of the Fund's NAV owned by affiliates of Mackenzie and funds managed by Mackenzie. As a result of these investments, the Fund is subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions.

On May 22, 2018, funds managed by Mackenzie redeemed approximately \$95 million of securities in the Fund. On May 28, 2018, a large investor redeemed approximately \$95 million of securities in the Fund. On June 5, 2018, companies affiliated with Mackenzie redeemed approximately \$367 million of securities in the Fund. These redemptions did not result in a significant change in the Fund's portfolio allocation and were managed without any adverse effect on the Fund.

#### **Fees and Expenses**

The management expense ratio ("MER") for Series A of 2.52% during the year ended March 31, 2018, was unchanged from the MER for the year ended March 31, 2017. The MER for Quadrus Series of 2.63% during the year ended March 31, 2018, was slightly lower than the MER of 2.64%

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2018

for the year ended March 31, 2017. The MERs (before and after waivers or absorptions, if any) for each series are presented in the *Financial Highlights* section of this report.

#### **Recent Developments**

Emerging markets equity valuations ended the year near their long-term average. The portfolio management team believes they have room to rise further, supported by positive news flow. The most important risks to emerging markets appear to be external. As the February sell-off demonstrated, the emerging markets bull market remains dependent on the global bull market. Global equities may be dampened by gradual tightening monetary policy from the U.S. Federal Reserve as well as U.S. protectionism. Of the two, the team believes a trade war would have more serious consequences. Risks within emerging markets include the 2018 presidential elections in Mexico and Brazil. The team recommends that investors add to emerging markets exposure on pullbacks, as long as the growth and earnings outlook remains supportive.

Effective May 17, 2018, Mackenzie Investments Corporation replaced JP Morgan Asset Management (Canada) Inc. as the sub-advisor to the Fund. The Mackenzie Global Quantitative Equity team, led by Arup Datta, will manage the Fund using a quantitative investment approach.

Effective June 1, 2018, Series PWF securities were consolidated into Series F securities.

On June 22, 2018, investors in the Fund and investors in Mackenzie Emerging Markets Opportunities Class will vote on the proposed merger of Mackenzie Emerging Markets Opportunities Class into the Fund. This merger, which would be effective on or about July 6, 2018, is also subject to the receipt of regulatory approvals. Mackenzie does not consider this merger to be a material change from the Fund's perspective.

### **Related Party Transactions**

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

#### **Management and Administration Services**

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not otherwise included in management fees. See also *Management Fees*.

#### **Other Related Party Transactions**

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. Series S securities are also issued on a prospectus-exempt basis to London Life Insurance Company, The Great-West Life Assurance Company and The Canada Life Assurance Company (collectively, the "Related Insurance Companies"), all of which are companies affiliated with Mackenzie. At March 31, 2018, the Related Insurance Companies owned 35.6% of the Fund's NAV, and funds managed by Mackenzie owned 10.3% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day. The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

### **Past Performance**

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax adviser regarding your personal tax situation.

#### Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

The MSCI Emerging Markets (Net) Index is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of emerging markets. It consists of 23 emerging market country indices. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

- The percentage return differs for each series because the management fee rate and expenses differ for each series.
- (2) The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.
- (3) The return of the MSCI Emerging Markets (Net) Index since inception for each applicable series is as follows: Series D 11.2%, Series FB 14.5%, Series J 6.4%, Series PW 10.6%, Series PWF 11.0%, Series PWFB 19.2%, Series PWX 12.6%, Series U 9.5%, L Series 10.4%, N Series 9.9%, QF Series 21.7%.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

(1) This information is provided as at the end of the fiscal period shown.

- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie and Quadrus may waive or absorb operating expenses at their discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

### **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

Quadrus Investment Services Ltd. ("Quadrus"), an affiliate of Mackenzie, is the principal distributor for the Quadrus series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to Mackenzie. Under this arrangement, Quadrus was entitled to approximately 79% of the total management fees that Mackenzie received from the Quadrus Group of Funds during the year. As the principal distributor of the Quadrus series securities of the Fund, Quadrus is responsible for paying certain administrative costs and all distribution-related payments to registered dealers whose clients invest in those securities of the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 35% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

QF Series securities are offered to retail investors investing a minimum of \$500. Investors are required to negotiate their advisor service fee, which cannot exceed 1.25%, with their financial advisor.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option, various low-load purchase options and a no-load purchase option. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
